

Hello everyone I am Abirami I am studying b tech 3 rd year in vit university vellore and my course is cse spec with bioinformatics. i am joined nextwave academy in one year before. this academy teach many coding languages in briefly. first i learnt html,css and bootstrap.now i am learning python and c..This academy teaches coding concepts easily. and also they will teach many practice problems. nextwave academy conduct many webinars.The webinar conducted by ccbpians or top itians. they are give lots of ideas for my carreer.like how to get hight paid job and how to attend the interviews and what are the things companies required. this academy improve my coding skills and communicative skills. 3 weeks before nextwave academy conducted Generative AI Workshop webinar.it is very helpful webniar in my career. Less than 2% of peoples only know about Gen AI Applications and it's Tools. But I learnt the some gen al applications.that is my pleasure.

Thank you.
